

St. John's Earth Day Celebration 2023!

Tin Can Project Instructions

Please work on a covered surface, thank you!

- 1) **Add image** – Select desired image from recycled images, magazine, sheet music, newspaper, printed image, or create your own using crayons, colored pencils, or markers.
- 2) **Cut image to size** – Line image up on selected tin can and cut to desired size and shape (edges do not need to be straight).
- 3) **Apply image** – On a covered surface, apply a thin layer of mod podge to the back of the paper and then press it down onto the can using your fingers to smooth out any lumps.

You can print out just about anything imaginable from family photos to uplifting quotes to decorate your can. Other ideas for home – sticks, burlap, fabric, rope, chalkboard stickers and paint.
